# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

project.crawler.manager.CrawlerManager . . . . .	7
project.process.process.DataProcess . . . . .	8
project.analysis.pipeline.JupyterPipeline . . . . .	12
threading.Thread	
project.utils.thread.SpinnerThread . . . . .	14
ABC	
project.convert.converter.Converter . . . . .	6
project.convert.dwd_converter.DWDJsonConverter . . . . .	11
project.crawler.base.BaseCrawler . . . . .	5
project.crawler.dwd.DWDCrawler . . . . .	10
project.crawler.meteo_blue.MeteoBlueCrawler . . . . .	13
Thread	
project.utils.thread.ThreadWithReturnValue . . . . .	15

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">project.crawler.base.BaseCrawler</a>	5
<a href="#">project.convert.converter.Converter</a>	6
<a href="#">project.crawler.manager.CrawlerManager</a>	7
<a href="#">project.process.process.DataProcess</a>	
Process for data literacy class	8
<a href="#">project.crawler.dwd.DWDCrawler</a>	10
<a href="#">project.convert.dwd_converter.DWDJsonConverter</a>	11
<a href="#">project.analysis.pipeline.JupyterPipeline</a>	12
<a href="#">project.crawler.meteo_blue.MeteoBlueCrawler</a>	13
<a href="#">project.utils.thread.SpinnerThread</a>	14
<a href="#">project.utils.thread.ThreadWithReturnValue</a>	15

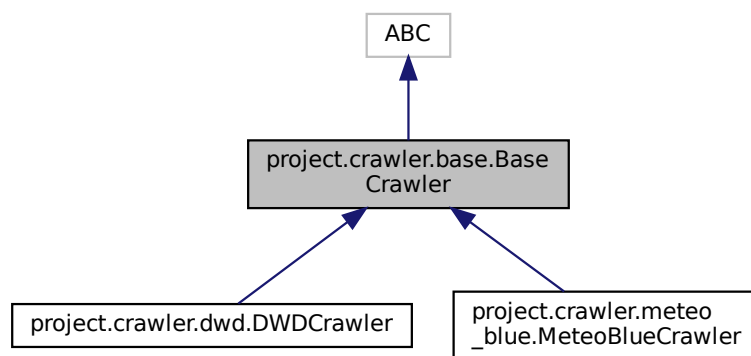

## Chapter 3

# Class Documentation

### 3.1 project.crawler.base.BaseCrawler Class Reference

Inheritance diagram for project.crawler.base.BaseCrawler:

Collaboration diagram for project.crawler.base.BaseCrawler:

## Public Member Functions

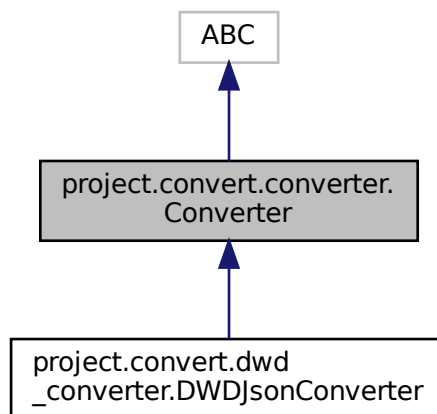

- None `__init__` (self)
- def `get` (self, bool save=False)

The documentation for this class was generated from the following file:

- docs/code/tmp/project/crawler/base.py

## 3.2 project.convert.converter.Converter Class Reference

Inheritance diagram for project.convert.converter.Converter:

Collaboration diagram for project.convert.converter.Converter:

## Public Member Functions

- None **\_\_init\_\_** (self)
- List[DataFrame] **to\_df** (self, object data)  
*convert data to a DataFrame*

### 3.2.1 Member Function Documentation

#### 3.2.1.1 to\_df()

```
List[DataFrame] project.convert.converter.Converter.to_df (
    self,
    object data )
```

convert data to a DataFrame

#### Parameters

<i>data</i>	<i>description</i>
-------------	--------------------

#### Exceptions

<i>NotImplementedError</i>	if method is not implemented
----------------------------	------------------------------

#### Returns

DataFrame data in a DataFrame object

The documentation for this class was generated from the following file:

- docs/code/tmp/project/convert/converter.py

## 3.3 project.crawler.manager.CrawlerManager Class Reference

### Public Member Functions

- None **\_\_init\_\_** (self, List[BaseCrawler] crawler, datetime pull\_time)
- def **start** (self)
- def **process** (self)

The documentation for this class was generated from the following file:

- docs/code/tmp/project/crawler/manager.py

## 3.4 project.process.process.DataProcess Class Reference

process for data literacy class

### Public Member Functions

- None `__init__` (self)  
*summary*
- def `start_crawler` (self, str crawler\_config\_path="project/config/crawler.config.yaml")  
*start crawler to collect weather data from APIs specified in crawler config*
- def `analyse` (self, bool use\_active\_venv=False)  
*start pipeline to analyse data.*
- def `get` (self, bool save=True)  
*send request to every embedded crawler and return pandas data frame heads onto terminal*
- def `get_historical` (self, List[int] station\_ids, str save\_path)  
*get historical (precipitation, pressure, air temperature) data from the dwd database*
- def `get_recent` (self, List[int] station\_ids, str save\_path, List[str] features, bool unpack=True)  
*get recent (precipitation, pressure, air temperature) data from the dwd database*
- def `convert_to_csv` (self, str input="data/dwd/raw", str output="data/dwd/csv")  
*convert the forecast data into csv format*

### 3.4.1 Detailed Description

process for data literacy class

### 3.4.2 Member Function Documentation

#### 3.4.2.1 analyse()

```
def project.process.process.DataProcess.analyse (
    self,
    bool use_active_venv = False )
```

start pipeline to analyse data.

`use_active_venv` (bool, optional): set this flag if you have poetry installed and would like to run the

#### 3.4.2.2 convert\_to\_csv()

```
def project.process.process.DataProcess.convert_to_csv (
    self,
    str input = "data/dwd/raw",
    str output = "data/dwd/csv" )
```

convert the forecast data into csv format

## Parameters

<i>input</i>	root folder of all forecast json files. Defaults to "data/dwd/json/raw @param output where to output the csv file structure. Defaults to "data/dwd/raw
--------------	--

**3.4.2.3 get()**

```
def project.process.process.DataProcess.get (
    self,
    bool save = True )
```

send request to every embedded crawler and return pandas data frame heads onto terminal

save (bool, optional): if set to true save results. Defaults to True.

**3.4.2.4 get\_historical()**

```
def project.process.process.DataProcess.get_historical (
    self,
    List[int] station_ids,
    str save_path )
```

get historical (precipitation, pressure, air temperature) data from the dwd database

## Parameters

<i>station_ids</i>	<i>description</i>
<i>save_path</i>	<i>description</i>

## Exceptions

<i>NotImplementedError</i>	<i>description</i>
----------------------------	--------------------

**3.4.2.5 get\_recent()**

```
def project.process.process.DataProcess.get_recent (
    self,
    List[int] station_ids,
    str save_path,
    List[str] features,
    bool unpack = True )
```

get recent (precipitation, pressure, air temperature) data from the dwd database

## Parameters

<i>station_ids</i>	station ids from DWD
<i>save_path</i>	where you want to store the collected information. It will create this directory if it does not exist already.
<i>unpack</i>	if set to true we will also unpack the downloaded zips
<i>features</i>	features you want to extract from DWD API

**3.4.2.6 start\_crawler()**

```
def project.process.process.DataProcess.start_crawler (
    self,
    str crawler_config_path = "project/config/crawler.config.yaml" )
```

start crawler to collect weather data from APIs specified in crawler config

## Parameters

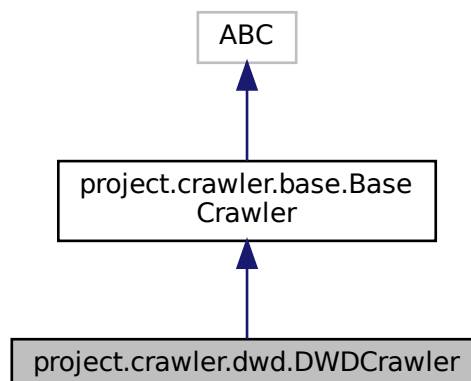

<i>crawler_config_path</i>	crawler config for individual apis
----------------------------	------------------------------------

The documentation for this class was generated from the following file:

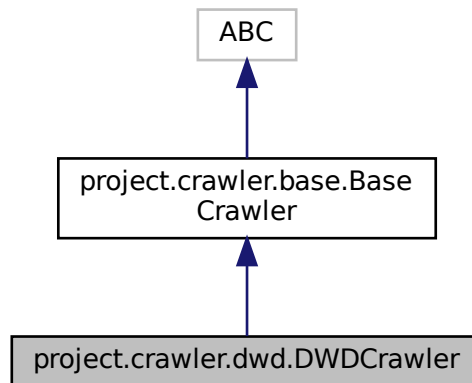

- docs/code/tmp/project/process/process.py

**3.5 project.crawler.dwd.DWDCrawler Class Reference**

Inheritance diagram for project.crawler.dwd.DWDCrawler:

Collaboration diagram for project.crawler.dwd.DWDCrawler:

### Public Member Functions

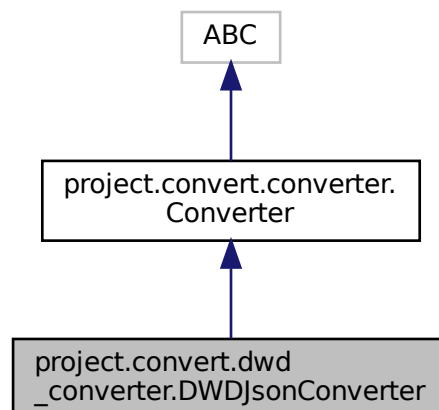

- None `__init__` (self, str api\_identifier, List[int] station\_ids)

The documentation for this class was generated from the following file:

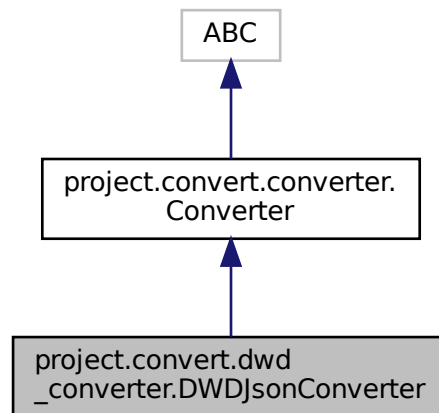

- docs/code/tmp/project/crawler/dwd.py

## 3.6 project.convert.dwd\_converter.DWDJsonConverter Class Reference

Inheritance diagram for project.convert.dwd\_converter.DWDJsonConverter:

Collaboration diagram for `project.convert.dwd_converter.DWDJsonConverter`:

### Public Member Functions

- None `__init__` (self)
- `List[DataFrame]` `to_df` (self, `Dict[str, Any]` data)

The documentation for this class was generated from the following file:

- `docs/code/tmp/project/convert/dwd_converter.py`

## 3.7 project.analysis.pipeline.JupyterPipeline Class Reference

### Public Member Functions

- None `__init__` (self, bool use\_active\_venv=False, str note\_book\_listing\_path="project/config/analysis\_notebooks/scripts.yaml")
- `def run` (self)  
*Start pipeline.*

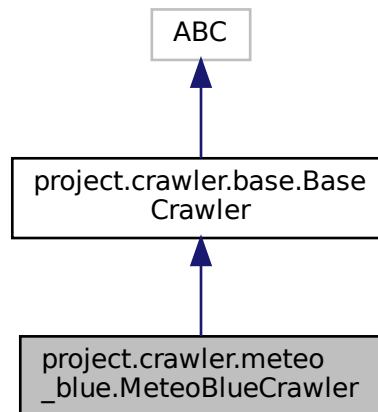

The documentation for this class was generated from the following file:

- `docs/code/tmp/project/analysis/pipeline.py`

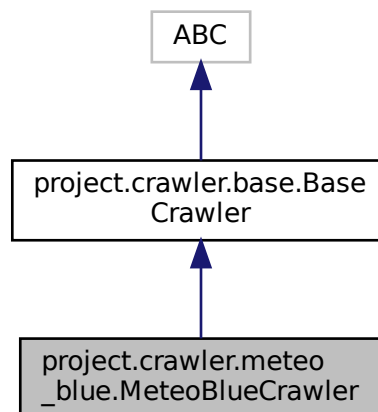

## 3.8 project.crawler.meteo\_blue.MeteoBlueCrawler Class Reference

Inheritance diagram for project.crawler.meteo\_blue.MeteoBlueCrawler:

Collaboration diagram for project.crawler.meteo\_blue.MeteoBlueCrawler:

### Public Member Functions

- None `__init__` (self, str key, str package, str format="json")

The documentation for this class was generated from the following file:

- docs/code/tmp/project/crawler/meteo\_blue.py

### 3.9 project.utils.thread.SpinnerThread Class Reference

Inheritance diagram for project.utils.thread.SpinnerThread:

Collaboration diagram for project.utils.thread.SpinnerThread:

#### Public Member Functions

- `def __init__(self)`
- `def stop(self)`

The documentation for this class was generated from the following file:

- `docs/code/tmp/project/utils/thread.py`

## 3.10 project.utils.thread.ThreadWithReturnValue Class Reference

Inheritance diagram for project.utils.thread.ThreadWithReturnValue:

Collaboration diagram for project.utils.thread.ThreadWithReturnValue:

### Public Member Functions

- `def __init__ (self, group=None, target=None, name=None, args=(), kwargs={}, Verbose=None)`
- `def run (self)`
- `def join (self, *args)`

The documentation for this class was generated from the following file:

- `docs/code/tmp/project/utils/thread.py`
